

Declutter Your Entire Home One
Day At A Time

Module Six

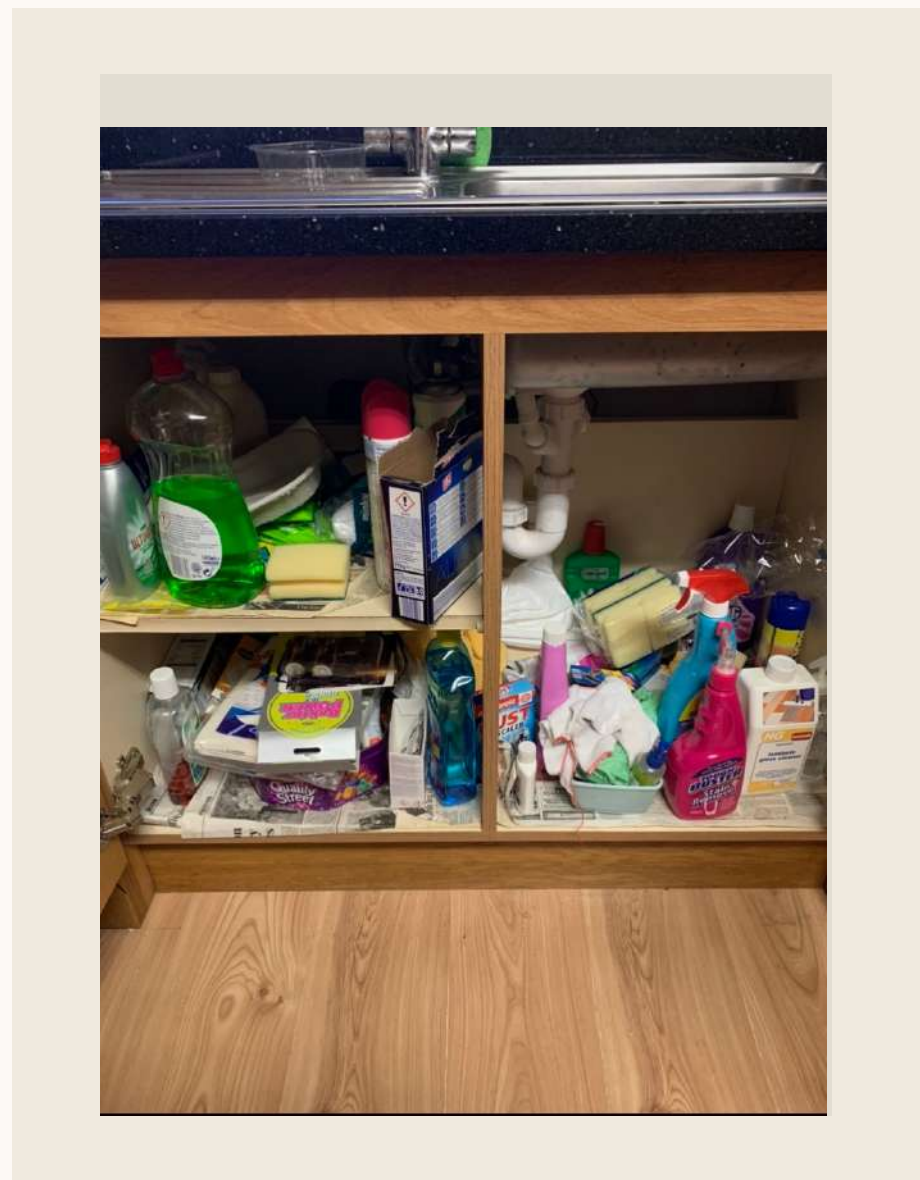

Organising Miscellaneous Items
Together

Created By :

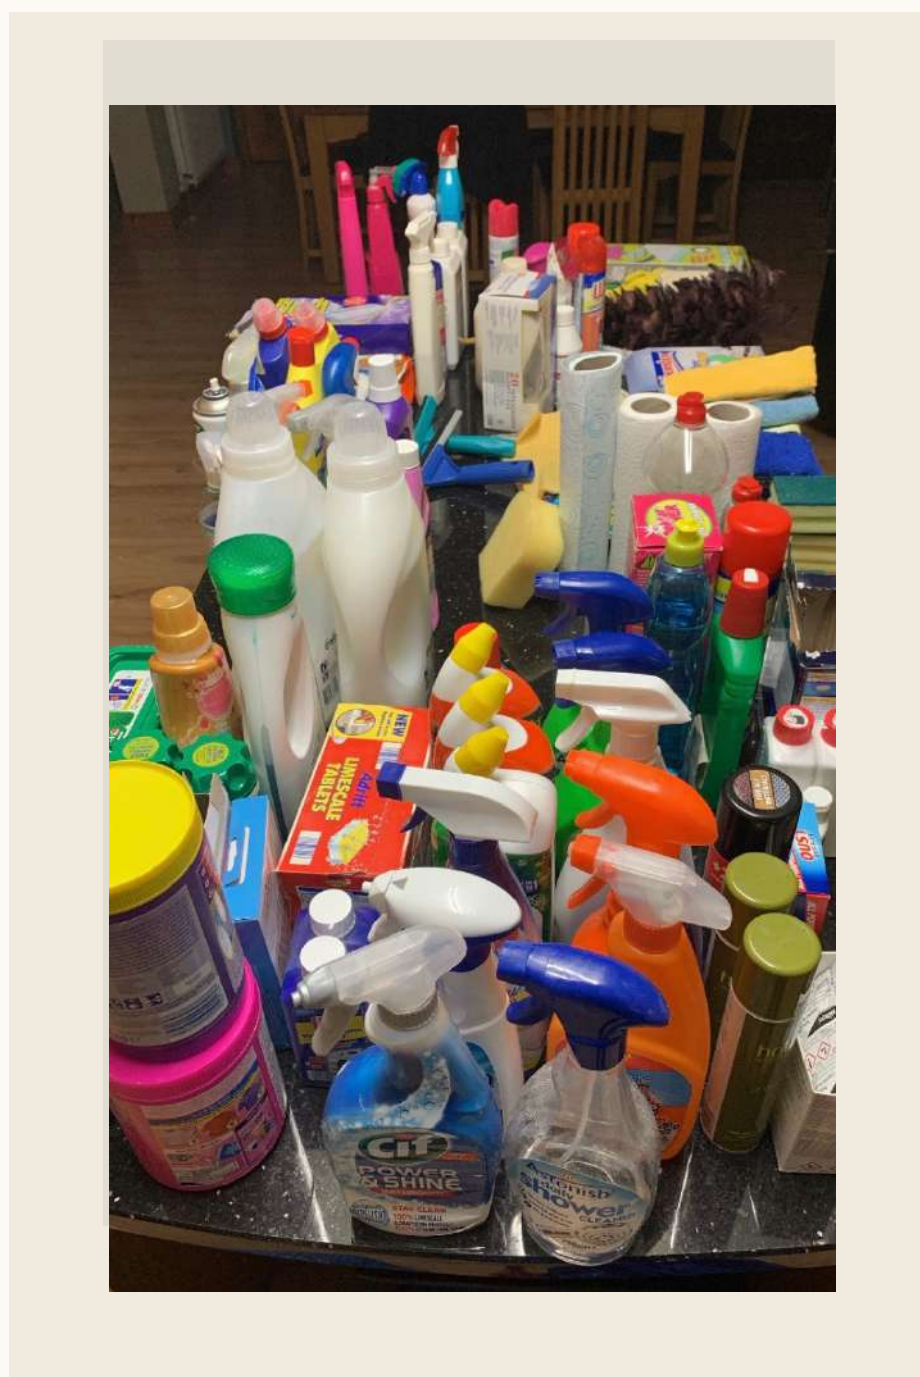

Sharon Mc Nulty

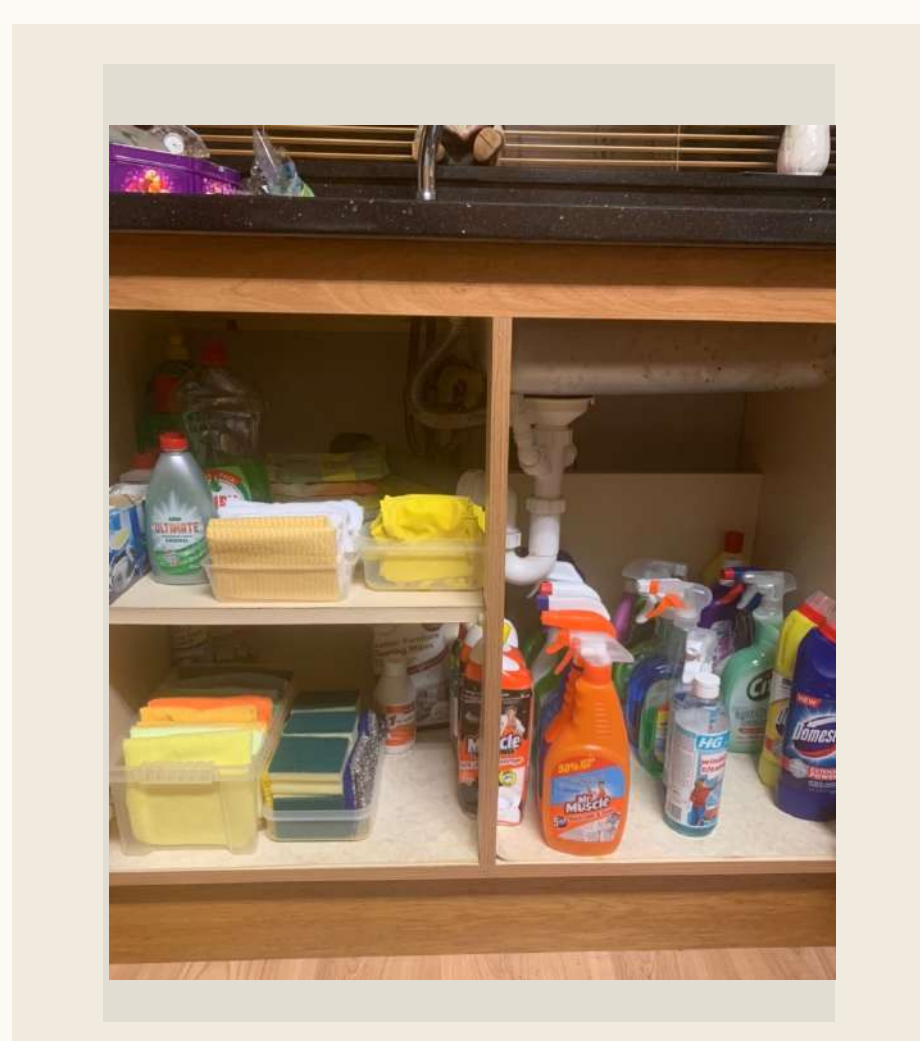

How to DECLUTTER YOUR MISCELLANEOUS ITEMS

- 01
- Working within each category as directed, gather similar items from around the house, double check if that is everything eg- organise all toiletries together, medicines together, tupperware together, plastic bags together etc.
 - Place each sub-category together and realise just how many of each item you have.
 - You will feel overwhelmed and annoyed at the waste- this is an important part of the process and will change the way you shop from here on in.

- 02
- Take each item in your hands one by one, check the condition, check the expiry dates.
 - Think how often you use that item and how likely you are to need it in the future.
 - Decide how many of each item you need and choose the best of these.
 - You can discard, donate, sell or repurpose the remaining items.
 - Remember silent gratitude- for coming into your life, showing you no longer need it, knowing others will love it.
 - Take this opportunity to give your storage a quick clean now they are empty.

- 03
- Assign each item a place and put it back there after use. If you follow this rule, you will only have to tidy once.
 - Your family will come on board in their own time, once they see the change in you they will want a piece of that.
 - Be patient with them in the meantime and enjoy your beautiful home.
